

ownCloud for Users

Efstathios Iosifidis

iosifidis@opensuse.org

- Access files from anywhere
- Access calendar from anywhere
- Access contacts from anywhere
- Easy sharing and collaboration
- All free!!!

The awesome cloud

- Accessible everywhere
- Back up online
- Easy sharing and collaboration
- All free!!!
(or super cheap)

The awful cloud

- Where is my data?
- Who can access my data?
- How is my data used?

This thing called privacy

What do you have to hide?

I. You don't know!

II. You **SHOULD** have something!

III. Everybody needs privacy

Take back your data

Introducing ownCloud

- Sync and share
- Open Source
- Easy to use
- Easy to install
- Easy to extend
- >1.8 mln users

Sync and Share

- Multi-platform
- External Storage
 - FTP, NFS, WebDAV, dropbox, S3, ...
 - Encryption
 - Versioning
- Sharing
 - Public links, passwords, expiring, upload rights
- Server to server sharing

Easy to use

- Easy to deploy: LAMP
- Easy to hack on or inspect: PHP, JS, CSS
- All-platform access

OwnCloud Apps

Security Warning

You are accessing ownCloud via HTTP. We strongly suggest you configure your server to require using HTTPS instead.

Remote Shares

- Allow other instances to mount public links shared from this server
- Allow users to mount public link shares

Contacts

- Enable LDAP Backend

Enable LDAP backend for the contacts application

Warning: LDAP Backend is in beta mode, use with precautions

Documents

MS Word support (requires openOffice/libreOffice)

- Local

openOffice/libreOffice is installed on this server. Path to binary is provided via `preview_libreoffice_path` in `config.php`

- External

openOffice/libreOffice is installed on external server running a format filter server

ownCloud 7.0 User Documentation

Welcome to ownCloud: your self-hosted file sync and share solution.

ownCloud is open source file sync and share software for everyone from individuals operating the free ownCloud Community Edition, to large enterprises and service providers operating the ownCloud Enterprise Edition. ownCloud provides a safe, secure, and compliant file synchronization and sharing solution on servers that you control.

With ownCloud you can share one or more files and folders on your computer, and synchronize them with your ownCloud server. Place files in your local shared directories, and those files are immediately synchronized to the server and to other devices using the ownCloud Desktop Client. Not near a device running a desktop client? No problem! Simply log in using the ownCloud web client and manage your files from there. The ownCloud Android and iOS mobile applications enable you to browse, download, and upload photos and videos. On Android, you can also create, download, edit, and upload any other files, as long as the correct software is installed.

Whether you are using a mobile device, a workstation, or a web client, ownCloud provides the ability to put the right files in the right hands at the right time on any device with one simple-to-use, secure, private and controlled solution. After all, with ownCloud, it's Your Cloud, Your Data, Your Way.

Web Interface

The following topic contains a general overview how to access ownCloud from a web browser like Firefox, Chrome, or Internet Explorer:

- [The ownCloud Web Interface](#)

File Access and Management

The following topics contain information about file access and management. Access information includes how to access your server using the ownCloud web interface or through the use of WebDAV shares (Linux or Mac OSX) or web folders (Windows):

- [Accessing your Files Using the Web Interface](#)

Install Desktop Clients

Latest stable version: 1.6.4 ([Changelog](#))

Synchronise your ownCloud with your computer using our desktop clients. Select one or more directories on your local machine and always have access to your latest files wherever you are.

 Windows XP, Vista, 7 and 8	 Mac OSX 10.7+, 64 bit	 Linux Multiple distributions
---	--	---

Looking for the [Sources \(PGP signature\)](#)? For more information on the sync client, check out the [documentation](#).

Install Mobile Apps

Mobile apps are available in both the Apple App Store and the Google Play Store, allowing you to access, sync and upload your data on the go.

	
---	--

Looking for the [Android Sources](#)? Looking for [F-Droid](#)?

Integrate with your ownCloud

ownCloud is compatible with a large range of 3rd party applications and services. Use ownCloud to store your data and better integrate with your web

ownCloud in a box ★★★★☆

Published by [Cornelius Schumacher](#) Based on [openSUSE 13.1 32-bit x86](#) Homepage at <http://owncloud.org>

ownCloud in a box packages ownCloud as an appliance, so you can easily run it in a virtual environment, as a live system or install it on a disk.

Run the appliance, go to [http://\[yourservername\]/owncloud](http://[yourservername]/owncloud), and follow the instructions there.

Also remember to change the root password of the system after the appliance has booted.

One note about the versioning of the appliance: The major version of the appliance follows the major version of ownCloud. The minor versions are not directly related. See the release notes for what exact minor version is included in the appliance.

Cloud

Release notes

Upgraded to 7.0.2 and current updates of openSUSE 13.1.

There still is a bug in ownCloud which makes the test for WebDAV fail in Testdrive. Just ignore, if ownCloud says it can't do WebDAV, it can.

Release notes from ownCloud:

Upgrade

**ownCloud will be updated to
version 7.0.2.**

**Please make sure that the database, the
config folder and the data folder have
been backed up before proceeding.**

Start update

To avoid timeouts with larger installations, you
can instead run the following command from
your installation directory:
`./occ upgrade`

ownCloud – web services under your control
